DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 4,337,634 to Strudel.

Regarding claim 1, Strudel discloses an adjustable swage for use on a tubular, comprising: a body that has a round shape when assembled mounted to a mandrel central of the arms 6 (see Figs. 2a-2b), wherein said body is movable, during expansion, into a plurality of positions to create a variety of profiles effective for a full 360 degrees about said mandrel (see col. 3, line 61 through col. 4, line 8; especially the last line of col. 3). It is noted that the tubular being expanded is a general tubular, wherein it is notoriously known to those of ordinary skill in the art that the tubular could be a downhole tubular. Therefore, it is of note that the Applicant has not specifically placed the adjustable swage in the downhole environment, but has simply stated that the tubular is a downhole tubular as a matter of intended use. This being said, there appears to be nothing in the disclosure of Strudel precluding the placement of the swage in a downhole environment.

Regarding claim 2, the profiles clearly comprise circular shapes (see Figs. 2a-3b), while it would be clear to one of ordinary skill in the art that non-circular shapes would be achieved in

tubulars that have non-uniform inner diameters upon manufacture, and/or in tubulars that have weaker or thinner portions around the circumference of the tubular.

Allowable Subject Matter

3. Claims 3-12, 17-22, and 25-28 are allowed.
4. Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments, see pages 7 and 8, filed February 2, 2006, with respect to the rejection(s) of claim(s) 1 and 2 under 35 USC 102(b) and (e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Strudel.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3672

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
